Offered through the Association of Bay Area Governments Pooled Liability Assurance Network

ABAG PLAN will be presenting a workshop on…

Workshop Announcement

Accident Investigation and Root Cause Analysis

Part I: Basic Accident/Incident Investigation and Root Cause Analysis

Part II: Forensic Photography Investigation

Part III: Accident Investigation Issues when Defending a Claim

Many accidents seem to happen for "obvious" reasons. However, there are usually multiple contributing factors. Effective incident/accident investigations can help establish what really happened and provide the basis for change to prevent re-occurrences.

Topics discussed will include:

- Investigation as a creative process
- Using the investigation to make a difference and create change
- Identifying contributing factors to actual incidents
- Using trend and inspection data to anticipate "accidents waiting to happen"
- Using the information to prevent future occurrence and reduce liability
- Using Forensic Photography Investigation
- Discussing issues arising from accident investigation when defending a claim

Lunch will be provided

Presenters:

Michael Taylor, Recreation & Facilities Director and Risk Manager, City of Saratoga
Mary Beth O'Connell, Loss Control Consultant, O'Connell Consulting
Gregg A. Thornton, Partner, Selman Breitman LLP

Audience:

Managers and supervisors, claims staff, risk managers, city attorneys, and other city/town employees responsible for accident/incident investigation

DATE & Time: April 12, 2016, 10:00 am – 2:00 pm

LOCATION: Saratoga Grace Building, 19848 Prospect Road, Saratoga, CA

RESERVATIONS: Please register directly at ***http://www.abag.ca.gov/plan/training.html***
