

Alliant Loss Control Services (ALCS) - General Risk Management Services

ALCS provides the following **Expert Services** to assist ABAG members' risk improvement efforts:

- Safety Management Organization and Orientation
- Safety Integration/Behavior Based Safety
- Safety Process Measurement
- Safety, Profitability, and Organizational Efficiency
- Cal/OSHA Regulations and Inspection Handling and Appeals
- Hazard Assessment and Regulatory Compliance Surveys
- Workers' Compensation and Liability Claims Audits
- Accident Investigation and Analysis
- Developing Operation Specific Self-Inspection Programs and Checklists
- Loss Control Inspections
- Injury And Illness Prevention and Codes of Safe Practice Programming

Additionally, ALCS develops and delivers customized training programs for a variety of Risk Management topics. The following is sample of a few Risk Management training programs available through ALCS:

- Managing Sidewalk Construction, Maintenance and Repair Program to Mitigate Hazards and Claims – provides training in liability lessons learned and provides tools to develop and maintain sidewalks in a reasonable state of repair, free of dangerous and unsafe conditions.
- Accident Investigation and Root Cause Analysis – The program trains participants in incident investigation methods. The trainer then guides participants through accident scenarios to help determine accident root causes.
- Disaster Management and Business Interruption – This program focuses on specific areas of vulnerability and business impact in the event of a disaster.

ALCS Consultants work with you during program development, in order to:

- Evaluate your training needs
- Determine the course/workshop content
- Help you publicize training to the potential audience(s)
- Measure course success after training
- Continuously improve your training programs

Larry Bailey, CSP, REM, will act as project manager. Mr. Bailey brings 24 years of loss control experience in safety, claims administration and risk management to this unique project. In the past, his risk financing approaches have resulted in \$20 million dollars in direct and indirect client savings in workers compensation, general, auto, and property liability savings.

Bay Area Consultants

Bob Garon, CSP, has more than 25 years of loss control and safety experience including over 16 years experience with public entity loss control. . He has conducted dozens of training programs and more than 400 loss control surveys for property and liability evaluations for public, captive, and private insurance programs throughout California.

Carol Rossi, ARM has more than 10 years of experience in occupational health and safety consulting and loss control. Ms. Rossi has more than 11 years of casualty loss control experience as a former municipal risk manager and as an insurance industry loss control consultant. She uses her extensive background to create uniquely tailored safety programs and presentations.

Nick Voegtly, CSP has 26 years of casualty loss control experience as a risk management consultant. He has implemented beneficial programs meeting project needs by plan development, consensus building, and leading procedure launch and training required for success.
